

# Product Liability Investigations

Product liability investigations are complex and diverse, just like the products being investigated, and who better to investigate these unique matters than someone who has designed similar products, systems, or equipment.

## How Our People Make a Difference

Our experts have first-hand knowledge of how products are supposed to work and are authorities when it comes to why they don't. Our team collectively has decades of experience designing and manufacturing consumer products and industrial and commercial equipment.

## How We Operate

Envista employs experts, such as engineers, metallurgists, and chemists, to effectively qualify and analyze errors and connections between product design, use, and error.

Our liability experts have a diverse background in engineering, forensic analysis, manufacturing, product development, and extensive knowledge of applicable regulations and standards, which helps us perform comprehensive investigations and analyses of each product and component failure.

**Whether it's simple powered tools, complicated industrial equipment, or new technologies, Envista's multi-disciplinary team of engineers and experts has the experience product liability investigations.**

## How We Stand Out

Our team can conduct in-depth product testing and analysis to ensure the most accurate results.

With the knowledge and expertise that comes from thousands of investigations, our clients get access to experts that can assist in a variety of different investigations, including:

- » Automobiles & Vehicle Components
- » Building Materials
- » Construction Equipment
- » Consumer Products
- » Exercise/Recreational Vehicles & Equipment
- » Fires & Explosions
- » Gas & Electric Appliances
- » Industrial/Manufacturing Systems
- » Internet of Things (IoT)
- » Product Failures
